Dear Sir or Madam

B4642 - Coventry Road/Cawston Grange Drive - S278 Roundabout Improvements

This letter is a complaint from Cawston Parish Council in relation to the above roundabout improvements. Issues leading to this complaint are -

- 1) The completion date for the project has been moved several times with no definitive reason given as to why and no tangible completion date now provided
- 2) The work has required additional evening work which has caused significant disruption to the local residents
- 3) The management of traffic during the constriction has been chaotic. There have been times when the flow of traffic has not been clear, perceived entrances and exits closed without advisement and significant delays in journey times
- 4) Diversion signs for the roundabout have been misleading and not kept up to date
- 5) Issues with the roundabout construction have been compounded with the housing building going on which has effected road conditions for drivers

As a Parish Council we feel the project has unduly affected the local residents. As a consequence we wanted to raise the above issues and lodge a formal complaint with yourselves. We would welcome thoughts from the contractor Jacksons Civil Engineering and your own as regards how the residents of Cawston can be recompensed for the failure of this project.

Yours Faithfully,

On behalf of Cawston Parish Council
